PROFESSIONAL EXPERIENCE

Founder & Product Lead

January 2025 - Present

Ovara (Market Intelligence & Investment Research Platform)

Jamaica (Remote)

- Reduced manual market analysis effort by approximately 60% by automating the collection, cleaning, analysis, and reporting of Jamaica Stock Exchange market data.
- Built automated workflows that turn thousands of stock market data points into company reviews, investment summaries, portfolio reports, and company risk assessments, reducing the time needed to research and compare opportunities.
- Created tools that help users compare companies, understand risks, and make more informed investment decisions without needing advanced financial knowledge.
- Studied investor questions, competitor products, and user feedback to identify information gaps and common challenges, helping prioritise features that make investing easier to understand.

Centralised Processing Officer

Aug 2022 – Sept 2025

JMMB Group (Regional Financial Services Provider)

Kingston, Jamaica

- Maintained accuracy across 80+ daily financial transactions while meeting compliance, audit, and service delivery requirements in a regulated environment.
- Prevented customer, compliance, audit, and financial issues by identifying and resolving transaction discrepancies before they escalated.
- Resolved complex processing issues by working across operations, compliance, banking, and service teams to coordinate solutions.
- Protected customer outcomes and service continuity by investigating transaction exceptions and ensuring timely resolution.

Business Insight & Analytics Trainee

Jan 2023 – Sept 2025

JMMB Group (Regional Financial Services Provider)

Kingston, Jamaica

- Reduced manual reporting effort by approximately 30% through Excel and Power BI dashboards that improved visibility into workload, operational performance, and service delivery trends.
- Used operational and client data to identify recurring delays, workload imbalances, and process issues, helping management make more informed decisions.

- Improved access to business information by turning operational data into dashboards, reports, and performance summaries used by management teams.
- Analysed relationships between client activity, team workload, and operational outcomes to support planning and resource allocation decisions.

Utility Officer

Nov 2021 - Aug 2022

JMMB Group (Regional Financial Services Provider)

Kingston, Jamaica

- Improved document retrieval and record accessibility by maintaining organised, audit-ready documentation systems.
- Supported multiple business units by coordinating document workflows and maintaining accurate operational records.
- Strengthened compliance readiness through consistent documentation standards and record management practices.

Research Intern

Jul – Aug 2021

Department of Co-operatives & Friendly Societies (Government Regulatory Agency) | Montego Bay, Jamaica

- Supported regulatory reviews and decision-making through analysis of financial and operational information.
- Identified governance and compliance concerns through research and review of organisational records.
- Prepared evidence-based findings and recommendations to support regulatory assessments and oversight activities.

SELECTED PROCESS IMPROVEMENT PROJECTS

JMMB Group Jamaica

- Identified opportunities to reduce estimated departmental workload from 178 to 31 monthly hours by redesigning workflows, simplifying processes, and proposing automation solutions.
- Mapped how work moved between teams to identify delays, unclear responsibilities, and opportunities to improve efficiency.
- Designed new workflows for transaction processing, communication tracking, and issue resolution to reduce manual work and improve accountability.
- Presented process improvement recommendations to leadership after analysing operational risks, process gaps, and service delivery challenges.
